#### **Product traceability**

At reception, after verifying compliance with the specifications established with our suppliers, barcodes (batch) are established which identify the entire product. This applies to raw materials and primary and secondary auxiliary materials, which will be part of the finished product.

When these materials are used during the manufacturing process, their barcode is scanned to obtain as a result a label of the final product. This label identifies all the materials used on this product.

#### **Presentation and packaging**

Product packed in an opaque plastic bag with an inner layer of aluminum in 115g format with protective atmosphere.

#### **Dietary information**

Product suitable for everyone (celiac, diabetics...) except for people with hypertension and children under 3 years old.
