Storage and transport conditions

Transport and distribution should be carried out already packed in closed packages and protected from contamination.

Transport and storage should not take place together with toxic substances, parasiticides, rodenticides and other preventive and extermination agents, and prevent contact with altered, contaminated, adulterated or counterfeit foodstuffs.

General storage conditions: store in a cool, dry place away from light.

Storage conditions after opening: once opened, close the bag and consume within 3 days.

Best before: 4 months from the date of manufacture.

Producto traceability

At reception, after verifying compliance with the specifications established with our suppliers, barcodes (batch) are established which identify the entire product. This applies to raw materials and primary and secondary auxiliary materials, which will be part of the finished product.

When these materials are used during the manufacturing process, their barcode is scanned to obtain as a result a label of the final product. This label identifies all the materials used on this product.

Presentation and packaging

115g packaged in opaque bag with an internal aluminum layer in a protective atmosphere.
